

DISPLAY SHOWCASE

The OPAL range provides a colourful and informative interface compared to conventional elevator indicators enabling opportunities to promote tenants, building information, events, news and advertising.

The logo for OPAL TOUCH features a stylized icon of a building or grid of squares to the left of the text. The word 'OPAL' is in a large, bold, sans-serif font, and 'TOUCH' is in a smaller, bold, sans-serif font directly below it.

# OPAL TOUCH

The 'OPAL Touch' touchscreen solution provides a highly appealing and informative interface in comparison to standard elevator mechanical push buttons. User friendly software allows the owner to change and configure the display layouts without external assistance. The touch technology was developed to comply with the elevator environment whilst maintaining an elegant flush mounted panel sensitive enough to respond to a gloved touch.

# ONE WALL STREET

New York. The future of downtown Manhattan. Our OPAL Touch screens cater to every floor of this unique building.

- Screen Active State with available floor mask

- User selects available floors group

- PIN Keypad mode appears

- user enters PIN code

As well as touch, we offer unique solutions, including building foyer and directory boards, with elevator directions.

Riverside Centre is a vibrant business hub in the heart of Brisbane's Golden Triangle' precinct. Pixel Technologies manufactured 5 specifically built 46 inch touch screens to display the buildings tenant names.

When touched the screen displays the lift identification and direction to the correct lift to get to the desired tenant or office.

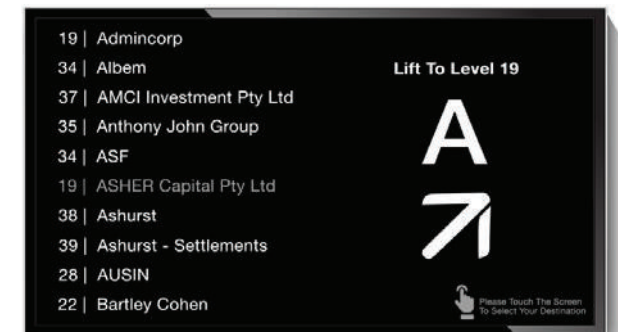

### Touch Display Steps

**Step one:** Walk up to display

**Step two:** select tenant

**Step two:** receive directions

# OPAL MARINA BAY SANDS
